

Preventative Maintenance Program

We know the success of your research relies on the precise operation of your Percival Scientific chamber(s). That's why now is the perfect time to consider **Percival's Preventative Maintenance Program**.

It's designed to keep your chamber(s) running for years with the accurate performance and environmental control you depend on.

There's no better way to protect your valuable investment.

Our service team has over 60 years of experience and can detect a potential issue before it causes a major breakdown.

– Ralan Nelson
Customer Support Manager

Preventative Maintenance Program

Through this program, our trained professionals provide onsite annual maintenance services to help minimize the need for costly future repairs, including:

Operational Checks:

- Calibration of relative humidity and temperature
- Fan motors and blowers
- Electrical System

Visual Inspections and Cleanings:

- Air-cooled condensers
- Water-cooled condensers, if applicable (for an additional fee)
- Humidifier pans and float valves
- Fan blades (as needed)
- Evaporator coils and drain lines (as needed)

Gauged Tests:

- Refrigeration systems
- Lighting system
- Humidification system (if applicable)
- CO₂ system (if applicable)
- Designed operating range capabilities
